Special Coastal Resiliency Training Workshop

Changes to lake levels and climate are forcing coastal communities to reevaluate how they manage land use, new development and infrastructure. This workshop will teach local planners, planning commissioners, elected officials, municipal staff and interested citizens in **Mid and Northeast Lower Michigan** how to address these dynamic challenges and build greater resiliency in their communities.

The workshop will be held on **May 22**. The workshop will provide a broad overview of Coastal Dynamics, Resilience Planning, and how changes in climate are impacting communities. In addition, the workshop will provide an engaging overview of scenario-based planning tools and how planners and local officials can use data to inform local planning.

May 22 Workshop - Introduction to Coastal Dynamics and Resilience Planning at Work

Featured Presentations from:

- Matt Warner, Coastal Hazard Specialist, Coastal Management Program, EGLE
- Harry Burkholder, Executive Director, LIAA
- Dr. Richard Norton, Professor, University of Michigan

Topics:

- How to use scenario planning and climate futures
- Understanding coastal dynamics and Great Lake water levels
- Understanding high-risk areas and management options
- Community vulnerability assessments
- Shoreline regulation and the Public Trust

Resilient Workshop Introduction to Coastal Dynamic and Resilience Planning at Work

Wednesday, May 22, 2019
6:00 pm – 7:30 pm

Bay-Arenac ISD, Education Services Center
4228 Two-Mile Road
Bay City, MI 48706
