Some Services (restrooms, food)
City/Village Name
No Services

* Traffic volumes are estimated based on an average 24-hour period. Rush hour (peak period) traffic volume can be much greater than at other times of the day. Traffic volumes also vary by season and day of the week.

** Minor roads generally have lower traffic volume, but road width and surface type may make them less appropriate as a bike route. Consult local county road commissions for more information. www.micountyroads.org

+ Inset maps may have thinner lines and circles
